

HIGH SCHOOL AEROSPACE SCHOLARS

*Texas high school juniors are invited to join
NASA as we **explore the moon to Mars!***

Train for the mission through an interactive online course that covers space exploration's past, present, and future. Highest achieving students will be invited to **spend an all-expenses paid week at NASA's Johnson Space Center.**

Students continue training and are mentored by NASA engineers and scientists while working with students from across the state to complete **hands-on engineering design challenges** and planning a mission to Mars.
